

College is Better by the Beach!

Not everyone gets to go to College in paradise. But for students at the **College of Coastal Georgia**, the Golden Isles is where they learn, study, and play.

There is much more to appreciate about the College than its location. A part of the University System of Georgia, Coastal Georgia offers high quality academics, competitive athletics, impeccable residence halls, and was named #1 Best Value in the state of Georgia - all in a vibrant collegiate community.

Many students take advantage of the College's location to pursue degrees in coastal ecology, hospitality and tourism management, or culinary arts. Others opt to join the nationally ranked nursing program or the criminal justice program, with instructors from the Federal Law Enforcement Training Center, and concentrations in Data and

Information Analytics, Cyber Defense, Homeland Security, or Public Management. Students in the Data Science program can concentrate their studies in Computational Data, Healthcare, or Financial Analytics. The recently established Lucas Center for Entrepreneurship provides students, and members of the Golden Isles community, access to mentoring services and consulting opportunities.

An exceptional education with personalized academic support just minutes from the beach... is it any wonder that students love the College of Coastal Georgia? And what a great place for parents to visit!

Come and see what brings students from all over our state, nation, and world to the Golden Isles!
