PITT COMMUNITY COLLEGE

Pitt Community College (PCC) was founded in 1961 and is the sixth-largest college in the 58-member North Carolina Community College System. PCC educates and empowers people for success. With a culture of excellence and innovation, the college is a vital partner in the economic and workforce development of our community. PCC provides access to dynamic learning opportunities designed to foster personal enrichment, successful career preparation, and higher education transfer.

The College awards associate degrees, diplomas and certificates for more than 60 programs and provides adult basic education, literacy training and occupational extension courses. The college serves more than 23,000 credit and non-credit students annually. The Associate in Applied Science in Information Technology: Cyber Security degree was designated a National Center of Academic Excellence in Cybersecurity in 2020. PCC offers an Associate in Applied Science in Cyber Security, a Cyber Security Certificate, and a Cyber Security Career and Technical Education Pathway for high school juniors and seniors.

The Cyber Security curriculum focuses on planning, implementing, and monitoring appropriate security controls to safeguard and protect computer networks and information. The program provides students with the skills required to implement effective and comprehensive information security controls. The program is supported by an active Advisory Board and academic partnerships with Cisco, Oracle, Microsoft, NDG, Palo Alto, Red Hat, and VMWare.
